Skills

JavaScript ES6
HTML
CSS
React
NodeJS
SQL
MongoDB
Front-End
Web Development

Successfully graduated from the UofT Full Stack Coding Bootcamp, I am on a constant journey to improve my skills.

Goal-oriented, punctual and reliable, I never say no to a new challenge.

Looking for a career change that will give me the chance to grow professionally while allowing me to use my time-management, problem-solving, collaboration, logistics, and leadership skills.

My previous career in hospitality gave me the possibility to travel and gain experience in various countries, like the USA, the United Kingdom and Italy, the resilience built in those years and the exposure to different people and realities, are among my strongest personal assets.

Experience

Multiple Restaurants / Head Chef

June 2014 - December 2020

- TORONTO, ONTARIO
- LONDON, UK
- ROME, ITALY

- Ensured the delivery of a great customer experience, constantly monitoring and adjusting to the needs of the guest.

Problem solving and time management were essential, as well as effectiveness and clarity in communication both with co-workers and guests.

- Supervised phases of food procurement, production and service, inventory and ordering, food storage and rotation, food preparation, recipe adherence, plate presentation, and service and production time standards;

- Enforced all state and company policies and procedures for sanitation and food quality;

- Actively involved in cost control;

- Responsible for high volume day to day operations;

- Responsible for training of new hires;

- Responsible for managing the weekly schedule.
